

# Deliver Transformative AI Use Cases to Your SLED, Healthcare and Telecom Customers and Win Your Share of the Booming Market

From Siloed Observability to Unified Agentic Operations, with AI-in-a-Box from Cisco and Fabrix.ai

## AI-in-a-Box

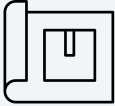

### The \$5 Trillion AI Opportunity

The global AI market will soar to \$4.8T by 2033<sup>1</sup>, a 25X increase over one decade. With that growth comes a rapid rise in AI workloads across industries—and a massive opportunity to capture demand while adoption is still in the early stages.

With Fabrix’s purpose-built, full-stack, and enterprise-ready Agentic Platform running on Cisco’s secure AI infrastructure, AI-in-a-Box enables you to own the AI conversation with your Public Sector customers while offering differentiated services to grow your business.

1. UN Trade and Development (UNCTAD) 2025 Technology and Innovation Report

How does the integration of Fabrix’s Unified Agentic Platform with Cisco’s Secure AI Factory, solve customer challenges more effectively than either solution alone?

## Digital Workers (AI Agents) for ITOps, NOCOps, SecOps, BizOps

- Future of Work - Complement your human workforce with Digital workforce
- Fabrix’s platform provides 50+ out-of-the-box Digital Workers ( AI Agents) for ITOps, NOCOps, SecOps, and BizOps use cases.
  - On-board your Digital workers, train them, evaluate them, while ensuring they are working within the designated guardrails
  - The real value of the platform lies in enabling customers and platforms to create their own Digital workers ( agents ) for bespoke use cases with Fabrix’s Agent Studio.
  - Fabrix is a plug-and-play platform and works as a unified agentic control plane for Operational Intelligence
- Enterprise customers are looking for Sovereign AI for their enterprise agentic use cases. Fabrix’s platform when paired with Cisco’s Secure AI Factory, delivers that Sovereign AI platform for Enterprises, Telcos and Service providers

### AI Use Cases for Your Public Sector Customers

Use Case	Technology Powering It
