Build

PREMIER

Three Ways We Accelerate Splunk Success

Enterprise & Telecom Discovery Intelligence

- ▶ Automated topology & dependency mapping
- ▶ Protocol discovery (CDP, LLDP, OSPF, BGP, ISIS)
- ▶ CMDB sync, asset lifecycle & compliance visibility
- ▶ Application Dependency Mapping (ADM)
- ▶ Datacenter, Campus, Edge & SD-WAN visibility
- ▶ Telecom transport, backhaul & packet core insights
- ▶ Multi-vendor visibility across network, compute, storage & cloud

Higher Data Quality Faster Onboarding Complete Context

Splunk ITSI Automation

- ▶ Auto-create ITSI services & service hierarchies
- ▶ Generate service KPIs & health score models
- ▶ Create entity types & vital metrics
- ▶ Build service dependencies automatically
- ▶ Configure correlation search & event aggregation policies
- ▶ Service Analyzer-ready service maps
- ▶ Reduce implementation effort & accelerate time-to-value

Weeks to Minutes Consistent Modeling Faster Adoption

Cross-Domain AI Agents

- ▶ Correlate Splunk data with external operational systems
- ▶ AI-powered root cause analysis across domains
- ▶ Investigate with logs, metrics, events, topology & dependencies
- ▶ Natural language copilots for Splunk & ITSI
- ▶ Guided remediation & operational workflows
- ▶ Integrates with VMware, Meraki, Mist, Dynatrace, FMC, ISE, ServiceNow, Nextthink & more
- ▶ Agentic workflows across network, compute, storage, security & cloud

Faster MTR Reduced Alert Fatigue Operational Efficiency
