Key Features

- ▶ Choose any LLM - cloud, on-prem, or hybrid deployment
- ▶ Trace every AI interaction with full flow & payload visibility
- ▶ Granular cost controls with model & team-level spend tracking
- ▶ Connect any ITOps tool or data lake via Universal MCP Server
- ▶ Build and deploy agents in minutes using no-code Agent Builder
- ▶ Protect data with AI personas, PII auto-masking & guardrails

Technical Outcomes & Benefits

- ▶ Reduce MTTR with autonomous detection, triage & remediation
- ▶ Minimize hallucinations via intelligent context compaction & caching
- ▶ Full auditability - explainable AI decision traces on every run
- ▶ Scale AI operations across teams without sacrificing governance
- ▶ Optimize AI spend with multi-model benchmarking & budget controls
- ▶ Deploy on-premises for data sovereignty and air-gapped security
