

Closed Loop Automation

Operational task automation with low-code bots & pipelines,
workflow orchestration, 3rd party integration.

- ▶ Automated Diagnostics and Remediation with native and 3rd party automation workflows.
- ▶ Continuous Monitoring for proactive issue detection and resolution.
- ▶ Self-Healing Networks and Improved Efficiency
- ▶ Auto-RCA, and AI/ML driven insights
- ▶ Automated change detection and CMDB/asset synchronization

1000+ Bot Library

- ▶ Bring your Own Data/Tools
- ▶ Bots perform atomic tasks
- ▶ Provide low-code usage
- ▶ Build your own bots with SDK

Automation with Pipelines

- ▶ OTEL Export Pipelines
- ▶ ML Pipelines
- ▶ Analytics Pipelines
- ▶ Enrichment Pipelines
- ▶ Data Ingestion Pipelines

Ready to Use Solution Packs

- ▶ Pre-packaged artifacts
- ▶ Turnkey experience for use cases
- ▶ Onboarding to Single Tenant or Multi-Tenant (MSP)

Workflow Orchestration

- ▶ MSP customer onboarding
- ▶ MSP customer deboarding
- ▶ Splunk ITSI Onboarding
- ▶ Build your own workflows/tasks

3rd Party Integration

- ▶ Python, Ansible, shell scripts
- ▶ Cisco, Itentia, Ericsson, Cienna, Nokia, Juniper, Terraform
- ▶ API integrations

DevOps Integration

- ▶ Jupyter Studio Workbench
- ▶ GitHub, Jenkins integration
- ▶ Pipeline debuggability, tracing
- ▶ Pipeline version, publishing
